A webinar "**Ethical Hacking & Cyber Security for Mobile Devices**" was organized by the Department of MCA, Sree Vidyanikethan Institute of Management, Sree Sainath Nagar, Tirupati. The program was organized on August 14, 2020. We have received 469 registrations from six states of our country and also one from another country. Students, faculty, research scholars, and industry executives are actively participated and gained knowledge. The webinar was conducted through the ZOOM platform.

The webinar was organized and a welcome address given by organizing secretary **Mr. V. Rahamathulla**, Assistant Professor, Dept. of MBA, SVIM. The opening remarks were provided by **Prof. N.Gurunatha Naidu**, Director of SVIM & Convener of the webinar. **Mr. Sarvanan**, Assistant professor, SVIM, and **Dr. E. Sree Devi**, Assistant professor, SVIM were the co-coordinators for the webinar.

Mr. **Sai satheesh**, **CEO & Founder of India Servers Ltd**, he is the most popular Ethical Hacking solution provider for government and private issues. He is the trainer and trainer of trainers in the domain of Ethical Hacking. He was the author of the books "**Ethical Hacking Secrets and Internet fundamentals**", is the resource person for the webinar. **Mr. Sai Satheesh** started his session with a **live example of cyber crime** and the basic concepts of cybercrime, cyber security, Ethical hacking has been discussed. **Mr. Sai satheesh** explained how to create **strong passwords, blocking of E-Mails**, and the information of fake sites. He has clearly explained about **phishing, fake calls, cyber attacks, injection attacks of Emails** and how to prevent the system and E Mail from the cyber attackers. He has explained the difference between the original domain and the fake domain with the help of sub domains.

Mr Sai Satheesh enlightens the mobile security by explaining the Mobile apps management and permissions of **Mobile apps, fake apps, Malware in the apps**. He has focused on the various reports issued by the central cyber crime protection cell about the fake mobile apps and hacker mobile apps. He has explained how the background apps are running without the prior knowledge of the user. He is also explained about the malware apps and routing of the mobile. Finally with a lot of patience, he has given excellent answers to the questions of participants more than 45 minutes.
